Software Developer & Data Analyst with 3+ years of experience building scalable web & mobile applications using React.js, React Native, Node.js, & TypeScript. Leveraging cloud platforms such as Azure & Firebase to deliver high performance solutions, driving informed decisions that accelerated business growth.

EDUCATION

California State University, Fullerton, *CGPA: 3.78/4*   **Fullerton, USA**
Master of Science, Major in Computer Science   Aug 2024 – May 2026

University of Mumbai – K.J Somaiya Institute of Technology *CGPA: 3.4/4*   **Mumbai, IN**
Bachelor of Engineering, Major in Information Technology   Aug 2017 – May 2021

TECHNICAL SKILLS

- **Languages**: JavaScript, Python, Java, Typescript, SQL
- **Frontend**: React.js React Native, Redux, React Hooks, HTML5, CSS3, Memoization, WebKit, ES6, Flexbox, Responsive Design
- **Backend**: Node.js, Express.js, RESTful APIs, JWT, Prisma ORM
- **Databases**: MYSQL, PostgreSQL, MongoDB, Microsoft SQL Server, Redis
- **Data Analytics & Visualization**: Power BI, Pandas, Matplotlib, Seaborn, Jupyter Notebook
- **Technologies & Others**: Git, GitHub, GitLab, Android Studio, Xcode, Docker, AWS, Azure, Postman, Firebase, Render, Data Structures & Algorithms, Object Oriented Design, Version control, Design Principles

EXPERIENCE

Adobe@Fullerton   **California, USA**
Data Analyst   May 2025 – Present

- Configured **role based access controls** & **automated moderation** on **Discord server**, enhancing security & streamlining user management for 250+ members, while decreasing administrative overhead by **10 hours weekly**.
- Presented **actionable insights** on user engagement trends to 15+ student board members, derived from analyzing **Discord** & **Adobe analytics**, enabling **data driven** event planning & **increased participation by 10%.**
- Analyzed student **event participation** & **email campaign performance** to identify **key engagement drivers**, resulting in a **20% increase** in student involvement within one semester by creating **visual dashboards & performance reports.**

SANKEY SOLUTIONS   **Mumbai, IN**
Solution Analyst   Jul 2021 – May 2024

- **Delivered a cross platform EV charging & retail mobile app** deployed across **900+** fuel, retail & EV sites, boosting customer engagement & **increasing footfall by 15%.**
- Integrated **WebSocket streams** & **REST APIs** to deliver real time EV charging insights, leading to a **10%** decrease in customer support inquiries related to charging status & pricing confusion.
- Implemented admin **control system** leveraging **Azure SQL**, **REST APIs**, **ReactJS, & Django**, facilitated instant **tariff updates**, minimizing pricing discrepancies across **900+ EV charging sites**.
- **Optimized invoice generation & reporting workflows**, normalizing databases, implementing **Redis caching**, & **scheduling cron jobs** cutting invoice time from **45s to 15s** & handling **10,000+ invoices/week**.
- Enhanced **app performance & UX** using **lazy loading**, virtualization, React Hooks & memoization**, reducing load times by 4%**.

PROJECTS

Regional Sales Analysis Power BI Dashboard: *Python, Power BI, Pandas, Matplotlib/Seaborn, Jupyter Notebook*   [**GitHub**](#)
- Performed comprehensive **Exploratory Data Analysis (EDA)** on monthly electronic sales data to uncover **revenue trends**, **peak sales periods**, & **customer purchase behavior** by identifying **top selling products**, **high performing regions**, **high value order patterns**.
- Consolidated and **transformed disparate sales**, **customer**, **product**, and **regional data** from **15+ Excel sheets** using **Python** (**pandas**), enabling comprehensive sales channel and customer segment analysis for **budget adherence**.
- Created a **Power BI dashboard** with key performance indicators (**KPIs**) such as customer lifetime value **(CLV)**, **state wise segregation**, **influencing strategic decisions**.

Hire Hour: *JavaScript, React Native (TypeScript), Node.js, Prisma ORM, PostgreSQL, SendGrid, Firebase*   [**GitHub**](#)
- Developed a mobile app using **React Native**, enabling users to book **freelance event staff,** completing testing 2 weeks ahead of schedule.
- Revamped the **data validation** process within the Node.js backend, leveraging **PostgreSQL** constraints to eliminate **95% of data integrity errors** identified in **development testing.**
- Established **Firebase App Testing** infrastructure by created **APK** and **iOS bundle** files, facilitating internal testing cycles to identify and resolve **15 critical bugs** before public release, achieving stable app launch.
